ALUMINIUM PLATFORM ACCESS LADDER
鋁平台連上落梯

Inspired by Canyon's original lorry access ladder, the platform access ladder is designed for typical use with the water tank on project sites. The ladder embodies a lightweight foldable design and provides handrails for safe access. The platform is designed for one person to stand on top for work and has a proper safety gate to help prevent the person from falling.

- Safety Working Load: 150 kg for 1 Person

⚠ Safety gate must be folded down after worker steps on to platform.

Aluminium Platform Access Ladder 鋁平台連上落梯
